EXPERIENCE

No. 1 practising school of Pécs, Pécs — Apprentice Teacher - English

March 2022 – Max 2022

I taught grades 10 and 11 that were both studying English at an upper intermediate – advanced level. All together had 30 lessons with them.

Kórházszuli, Pécs — Teacher

March 2020 - May 2020

When covid-19 broke out I found this opportunity to help the children of those parents who work in Public Health. I taught 4th and 5th graders English and Math.

Stipendium Hungaricum Mentorship, Pécs — Mentor

September 2021 - Today

Before September, 2021 I was the mentor in the mentorship program of the University of Pécs, then I started working for the government through the Stipendium Hungaricum scholarship program. Since then, I have been organizing events, programs, adventures, games, etc. for foreign students with my fellow mentors. I also take part in the selection process of future mentors for the program.

MaFiHe, Pécs — Member

September 2020 – November 2022

I was the member of MaFiHe in Pécs for more than 2 years. MaFiHe is an organisation that tries to popularize the importance and beauty of Physics through conferences, interviews, game nights, etc. I took participation in organising these both on- and offline.

Kovacs Bela Primary School of Pécs, Pécs – Teacher

September 2022 – November 2022

Since I did not feel like I get the proper practical training at the university, I took a job at a primary school with 2nd graders. I am specialized for high school, but I wanted some challenge in my profession. Thanks to my

SKILLS

- Outstanding Communication Skills
- Organising skills
- Good adaptation skills
- Spontaneity
- Fast learning, open-mindedness

LANGUAGES / CEFR level

English – C1/C2

Spanish – A2

German – A2

ability to play the ukulele we even performed a little act in the school.

Mezoszel Primary School of Pécs, Pécs — Physics Teacher

November 2022 – Present

Since my other major is Physics, I regularly get job offers from the District School Board of Pécs. In November, when I was finally all done with my assignments, I had time to work in a primary school as a Physics teacher.

Camps Equinunk and Blueridge, Pécs — Counsellor

Summer of 2022 (9 weeks)

Since I was a first-year student at the University of Pécs, I have always wanted to work in a summer camp in America. This summer, I managed to do that, and I had the best year of my life. I got sorted into the Lower-Sophs. They were the youngest ones in the camp which meant a huge challenge. Even though I got really sick, the whole experience in the camp helped me develop my organizing, leading and pedagogy skills.

EDUCATION

University of Pécs, teaching English as a Foreign Language and Teaching Physics, Pécs — *Master's Degree*

September 2018 - Present

Currently I am in my fifth year of the programme, which is all-together six years long. I have already done all my practices I could legally do, this is why I am looking for jobs all the time, so that I can improve my skills, get better in my profession.

About me

I have always thought about me as easy-going, life-loving, positive, and enthusiastic person, but it is especially true when it comes to teaching. I love teaching English, Physics, but the best is teaching Physics in English. When I started teaching English, I realized that I have a huge power in my hand. I get to get people together, offer opportunities to make friends, life-long bonds. This is how I got my best friends too. I love to organize events for my mentees as well, because there they can have a good time, and also enrich their language and culture. I try to do many things in my life so that I can use that somehow in teaching. This is how we had a little act in a primary school with my second graders where I played the ukulele. Whether it be sports, music, culture, an essay, a presentation, being “the boss”, it doesn't matter, because these are the exact things in life that I love doing, that make me feel ME. And I think that is the purpose of our lives.
